

Exercise 8

Storyboarding User Flow using Balsamiq

AIM:

The aim is to design low-fidelity mobile wireframes representing the user flow of the ParkPilot application using Balsamiq, incorporating both familiar (tap-based) and unfamiliar (gesture-based) navigation patterns.

PROCEDURE:

Step 1: Define the User Flow

1. Identify Key Screens

The following key screens were identified for the ParkPilot app:

- Onboarding / Intro Screen
- Login Screen
- Sign-Up Screen
- Home Dashboard
- Map / Navigation Screen
- Profile Screen

2. Map the User Journey

The user flow is designed as follows:

Onboarding (Swipe Up)

→ Login

→ Sign-Up (if new user)

→ Home Dashboard

→ Map / Slot Booking

→ Profile / Logout

Step 2: Create Wireframes using Balsamiq

1. Install Balsamiq

- Download and install from: <https://balsamiq.com/>

2. Create New Project

- Open Balsamiq
- Create a new project file

3. Add Wireframe Screens

- Create separate wireframes for each screen

4. Design Screens

- Use basic UI components:
 - Text labels
 - Input fields
 - Buttons

- Containers
- Icons

5. Organize Flow

- Arrange screens in logical sequence
- Connect screens using arrows to represent navigation

WIREFRAME DESCRIPTION (SCREEN-BY-SCREEN)

Screen 1: Onboarding / Intro

Elements:

- App Title: *ParkPilot* (centered)
- Subtitle: “Get Started”

Interaction:

- User swipes up to proceed

Notes:

- Minimal design
- No buttons used
- Represents **gesture-based navigation (unfamiliar)**

Screen 2: Login Screen

Elements:

- App title at top
- Input fields:
 - Email
 - Phone
 - Password
- “LOGIN” button
- Text: “Don’t have an account? Sign Up”

Interaction:

- Tap-based login
- “Sign Up” navigates to account creation

The image shows a mobile app mockup for the 'ParkPilot' login screen. At the top, there is a light purple header bar with the 'ParkPilot' logo in bold black text. Below the header, the main content area is white. It features two input fields: the first is labeled 'Email or Phone Number' and the second is labeled 'Password'. Below these fields is a prominent blue button with the word 'LOGIN' in white capital letters. Underneath the button is a blue link that says 'Sign Up'. To the right of the main content area, there is a vertical grey bar. At the top of this bar is a yellow box with the title 'Login Screen' and a description: 'A standard login interface with input fields for email, phone, password, a'.

Screen 3: Sign-Up Screen

Elements:

- Title: “Create your account...”
- Input fields:
 - Name
 - Phone
 - Email

- Address
- Password
- Text: “Let’s Begin →”

Interaction:

- User swipes right on “Let’s Begin”

Notes:

- No button used
- Represents **gesture-based confirmation (unfamiliar)**

ParkPilot

Create Your Account

Name

Phone

Email

Address

Password

Let's Begin → (Swipe right)

Sign-Up / Account Creation

An account creation form with input fields

Screen 4: Home Dashboard

Elements:

- Header with app name
- Location section:
 - Location text (e.g., T. Nagar, Chennai)
 - “Change” button
- Search bar
- Feature buttons:
 - Find Parking
 - Nearby Slots
 - Quick Park
- Recommended Parking:
 - Name
 - Distance
 - Price/hour
 - Slots available
- Recent Searches section
- Bottom Navigation:
 - Home
 - Map
 - Profile

Interaction:

- Fully tap-based navigation

Screen 5: Map / Navigation Screen

Elements:

- Header with app name
- Search bar
- Route info:
 - Start location
 - Destination

- Distance
 - Estimated time
- Static map image
- Parking details card:
 - Name
 - Distance
 - Price
 - Slot availability
- Buttons:
 - Navigate
 - Book Slot
- Bottom navigation bar

Notes:

- Map is **non-interactive**
- Designed for visualization only

Screen 6: Profile Screen

Elements:

- Profile icon
- User details:
 - Name
 - Phone
 - Email
 - Address

- “LOG OUT” button
- Bottom navigation

Interaction:

- Logout redirects to Login screen

RESULT:

The low-fidelity wireframes for the ParkPilot mobile application were successfully created using Balsamiq, demonstrating both traditional tap-based and innovative gesture-based navigation patterns.
